

## Liquid Filters

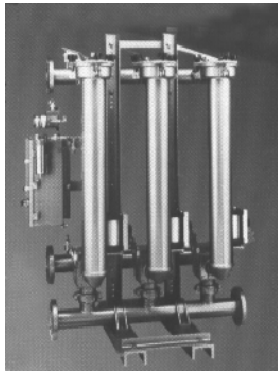

### SELF CLEANING GRAVITY FILTERS

For fresh water, recycled vacuum seal water and recycled white waters. A complement to tubular filters in a shower system.

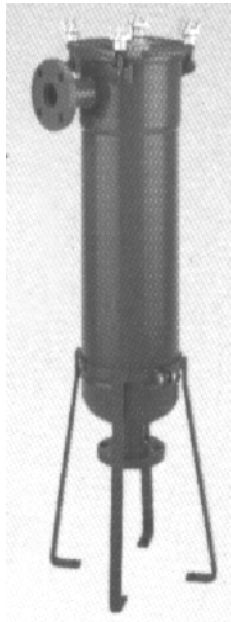

### DCF-400 AND 800 SERIES

For flows to 30 or 60 gpm features mechanical method; no water required

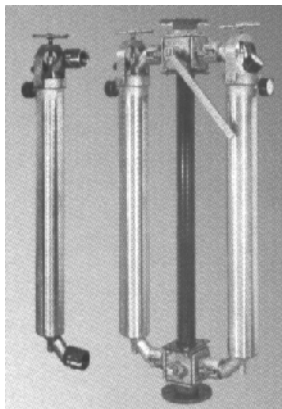

### MULTIPLEX BACKWASHING FILTER

Serve continuous service applications with lower labor and operating cost. Automation options delivers maximum waste minimization, system productivity and totally unattended service.

### SINGLE, DUO AND MULTIBAG FILTER

For batch, intermittent and continuous service when manual cleaning is acceptable.

### SINGLE AND DUO TUBULAR FILTER

Serve batch, intermittent and continuous applications requiring moderate flow such as wet end additives and the makedown of surface treatment slurries

### DCF 1000 and 2000

For coating, size press and slurries. More than 150 systems in more than 75 mills are replacing open gravity screens and less effective mechanically-cleaned filters.
