#### ECLIPSE

Featuring a unique style Eclipse offers a streamlined contemporary image that incorporates key distinguishing values and designs suggested by customers and consumers: Safety; Ease of use; High tech look and feel. Eclipse is designed to attract customers and create a distinguished look for your site. With contoured fiberglass surfaces, this premium dispenser can be designed with a wider variety of colors and finishes. Eclipse offers extended hose reach and easier hose handling for near and far-side fueling without retractors. Unit will be available as single Hose 3 grade, Blender + 0, or Blender + 1 -all with a standardized footprint of only 26".

#### ENCORE

This new state of the art dispenser presents an image consistent with your installed base, and offers new innovative concepts using advanced technologies to help you keep pace with changing market needs. Destined to become the world's first global dispenser, Encore will meet or exceed standards and regulatory compliance worldwide. The unit feature large easily read brand panels preferred by customers. With a new standardized 40.5" footprint, Encore is ingeniously designed to change from six hose to single hose or blender with very few hydraulic adjustments. The Customers interface module is available in three different configurations, depending on the number of hoses selected
