

METERS

Industrial Meters

Nutating Disc

- 2 to 160 GPM
- Measures dirty fluids
- Accommodates high viscosity fluids
- Economical for simple water metering
- Rugged
- Fed by pump or gravity flow

Oscillating Piston

- 2 to 300 GPM
- 0.5% rate accuracy
- Five metallurgies for broad material compatibility
- Low sensitivity to viscosity changes
- Stable non-drift calibration
- Modular components for easy maintenance

Turbine

- 4 to 3500 GPM
- Applications in shopping malls, apartments buildings, and general industrial service.
- Meters hot and cold water.
- Low pressure drop for minimal pumping cost
- Monitors effluent discharge
- Mechanical and pulsed output

Solvent

- 7 to 150 GPM
- Custody transfer accuracy for truck off-loading at paints, ink, and chemical plants
- Air release for venting of trapped air
- Temperature compensation
- Leak-proof design with no dynamic seals.
